

KorWeb

SKETCHING

Go beyond photographic locate documentation by adding more detail to your maps or tickets. The Sketching feature enables users to draw shapes, text, and custom drawings to enhance pictures for your custom reasoning. KorWeb allows users to use and store these sketches in the cloud, ensuring they are easily retrieved and never lost. Protect your organization from liability in the event of a damage or injury while providing excavators with the additional site information they need to proceed safely.

Clarify the content in your images and other audit trail documentation with additional notes, shapes, arrows, or free-hand drawings.

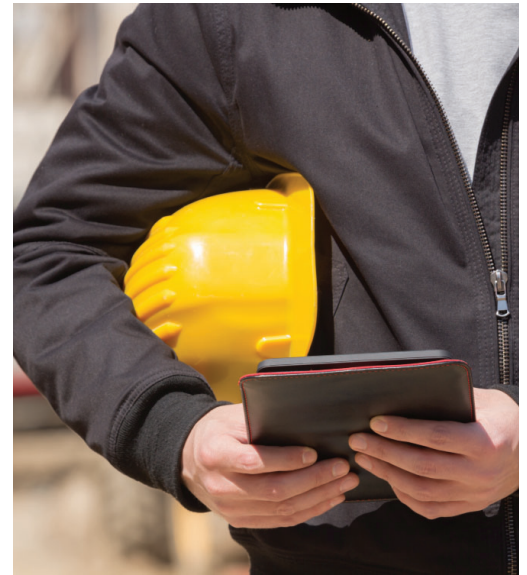

Image Clarification

Sketch directly from your phone or tablet to clarify anything you need to point out on an image. KorWeb stores sketches with the ticket itself.

Benefits

- Adds clarity to otherwise vague photos or maps
- Saves time with ability to upload information from anywhere
- Improves the damage claims process
- Improves safety for excavators
- Reduces clutter storing everything in the cloud

Features

- Add shapes, arrows, text, and drawings to photos and maps
- Sketch in free form or with predefined tools
- Notations remain attached to ticket for future reference

Contact KorTerra to find out how Sketching can help streamline your company's workflow.
